PROFESSIONAL SUMMARY

Java Backend Developer and MCA student (2026) with hands-on experience building RESTful APIs, full-stack web applications, and database-driven systems using Java, Spring Boot, Spring Data JPA, Hibernate, and MySQL. Proficient in MVC architecture, CRUD operations, and Agile development. Seeking a fresher Java Developer / Spring Boot Developer role to contribute to scalable backend systems.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL
Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate/JPA, RESTful APIs, JSP, Servlets
Frontend: React.js, HTML5, CSS3, Bootstrap, Vite
Databases: MySQL, SQLite, JDBC
Tools: Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code
Concepts: MVC Architecture, REST API Design, OOP, SDLC, Agile, CRUD Operations, Version Control
Exposure: Spring Security, JWT Authentication, Microservices (Learning)

PROJECTS

Safe Ride — Ride-Sharing Web Application | Java · Spring Boot · React.js · MySQL · REST API · Git [\[GitHub\]](#)

- Architected a full-stack ride-sharing platform using **Spring Boot** (backend) and **React.js** (frontend), following **MVC architecture** with clean separation of concerns.
- Designed and implemented **10+ RESTful API endpoints** for ride booking, user management, and trip tracking with JSON-based request/response handling.
- Engineered **MySQL relational schema** for users, rides, and drivers; performed **CRUD operations** via **Spring Data JPA** and Hibernate ORM.
- Integrated frontend-backend communication via **Axios**; managed project using **Git/GitHub** feature-branch workflow and Maven build.

ExpenseXpert — Personal Expense Tracker | Python · Django · MySQL · SQLite · Authentication [\[GitHub\]](#)

- Built a full-stack expense management application using **Django (Python)**, enabling users to track, categorize, and analyze personal finances with role-based access control.
- Implemented **user authentication** (login/registration/session management) using Django's built-in auth framework; applied **CRUD operations** via **Django ORM** with MySQL/SQLite.
- Delivered real-time category-wise filtering and date-range reporting; designed **responsive UI** using HTML5/CSS3 with client-side form validation.

Bus Booking System — Online Ticket Booking Platform | Core Java · JSP · Servlets · JDBC · MySQL · MVC [\[GitHub\]](#)

- Developed an end-to-end online bus ticket booking system using **Core Java, JSP, and Servlets**, following **MVC architecture** to separate business logic, presentation, and data layers.
- Implemented **JDBC-based MySQL connectivity** for route management, seat availability tracking, and booking workflows; handled HTTP lifecycle and session management using **Java Servlets**.

SEOlystic — SEO Analysis Tool (Hackathon) | React.js · Python · Vite · REST API

- Delivered a functional **SEO analysis prototype within a 30-hour hackathon**; built a React.js + Vite frontend with dynamic dashboards for keyword density, backlink tracking, and competitor benchmarking.
- Python backend served data via **REST APIs**; applied agile sprint planning and collaborative Git workflows across the team.

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

Dr. D. Y. Patil Institute of Management & Research, Pune CGPA: 8.40 / 10

Bachelor of Computer Science (BCS)

2021 – 2024

Sant Gadge Baba Amravati University 69.40%

CERTIFICATIONS & ACHIEVEMENTS

- [View All Certifications \(Google Drive\)](#) — Java, JavaScript, Python & more
- TATA GenAI Powered Data Analytics Job Simulation** — Data Analysis, GenAI, Python, SQL (2024)
- DYPDPU Hackathon 1.0** — Full Stack Web Development, Problem Solving (Feb 2025)
- Navonmesh 2025** — Project Innovation Event, Team-based Development
